EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

None of the references discloses alone or in combination a method and an apparatus of multiple communications pathways comprising transmitter being configured to receive a first electrical input signal and a second electrical input signal, and to provide a light signal having light modulation based on that first electrical input signal and average power over time based on that second electrical input signal, and receiver being configured to receive a light signal and to provide a first electrical output signal based on light modulation of that light signal and a second electrical output signal based on average power of that light signal over time, in combination with the remaining claimed limitations.

The most relevant references, Walsh (U.S. Patent 5,825,516) discloses a fiber optic communications, in which an optical energy to current converter that receives the optical energy transmitted through the fiber and converts it to a current proportional to the average power in the light transmission. Spirin et al. (U.S. Patent 6,753,520) disclose a fiber optic sensor. And Caplan et al. (U.S. 2002/0141694) disclose an optical communication system, in which the transmitter and receiver may be average-power-limited. However, there are no disclosures in the documents cited disclose or suggest the above limitations of the claimed invention.

Claims 1-21 are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
